

POLITIKA UPRAVLJANJA ENERGIJOM – TEMPERATURNI REŽIMI NA MEĐUNARODNOM AERODROMU SARAJEVO		Strana: 1 od 1
Broj protokola:		JAVNA UPOTREBA

J.P. Međunarodni aerodrom „SARAJEVO“ d.o.o. Sarajevo opredijeljeno je da:

- osigurava prihvatljive uslove boravka za putnike, zaposlenike i druge korisnike prostora;
- upravlja sistemima grijanja, hlađenja i ventilacije u skladu sa principima energetske efikasnosti;
- primjenjuje jedinstvene temperaturne režime za pojedine kategorije prostora;
- racionalno koristi energiju i smanjuje nepotrebnu potrošnju energenata;
- unapređuje energetske performanse objekata i tehničkih sistema;
- podržava aktivnosti smanjenja emisija CO₂ i ciljeve Airport Carbon Accreditation (ACA) programa;
- razvija i unapređuje sistem energetskog monitoringa zasnovan na mjerljivim podacima;
- promovira odgovorno korištenje energije i kontinuirano unapređenje sistema upravljanja energijom;
- doprinosi provedbi Politike okolinskog upravljanja i Politike smanjenja emisija Društva.

Primjenom ove Politike Društvo doprinosi racionalnom korištenju energije, poboljšanju energetskih performansi objekata, smanjenju emisija CO₂ i ostvarivanju ciljeva održivog razvoja.

P.C. Sarajevo International Airport LLC Sarajevo is committed to:

- ensure acceptable indoor conditions for passengers, employees and other users of the premises;
- operate heating, cooling and ventilation systems in line with energy efficiency principles;
- apply uniform temperature regimes for specific categories of premises;
- use energy rationally and reduce unnecessary consumption of energy sources;
- improve the energy performance of buildings and technical systems;
- support CO₂ emission reduction activities and the objectives of the Airport Carbon Accreditation (ACA) programme;
- develop and improve an energy monitoring system based on measurable data;
- promote responsible energy use and continuous improvement of the energy management system;
- contribute to the implementation of the Company's Environmental Management Policy and Emission Reduction Policy.

By applying this Policy, the Company contributes to the rational use of energy, improvement of the energy performance of buildings, reduction of CO₂ emissions and achievement of sustainable development objectives.

Sarajevo, 03.08.2026.

Acting General Manager

Dino Selimović
